PART I

#### ITEM 1. FINANCIAL STATEMENTS.

The unaudited financial statements for the six month period ended June 30, 1996, are attached hereto.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with the Financial Statements and notes thereto included herein.

The Company generated no revenues from its operations during the six month period ending June 30, 1996, and the Company is considered a development stage company. The plan of operation of the Company during the six month period ending June 30, 1996, generally involves the acquisition of additional mineral claims and the taking to patent of a number of the claims acquired and to be acquired by the Company in the future.

The Company incurred an operating loss during the six month period

ending June 30, 1996. The Company is expected to continue to operate at a loss until earnings, if any, are received from the harvesting of the metal and non-metal resources known to exist within the boundaries of the Company's properties.

The Company believes the income which it derives from its role as General Partner of the Timber Partnership and related activities will satisfy its cash requirements for the next six months, providing that the Company does not commence mining activities. At present, the Company's financial resources are not sufficient to commence mining activities. In order to satisfy the Company's capital requirements for additional drilling and to develop a mining feasibility program, it will be necessary for the Company to obtain additional financing in the minimum estimated amount of \$750,000. Management of the Company is continuing to seek possible interested partners to join with the Company in developing its mining claims. The Company is actively soliciting joint venture partners to expand its mining activities, based upon the valuation of the Company's claims and properties as reported in the independent engineering valuation report. The report also advised the Company to consolidate adjoining claims to make such joint ventures more attractive. The Company followed the advice of the independent engineering firm and the Company now has control of 125 continuous claims covering the known strike length of the "Morning Glory Structure" which is in excess of 14,000 feet. As of the date of this report, management is unaware of any third parties who are interested in joining with the Company in this regard. Exploration and mining activities of other mining companies in the surrounding area of Northern Montana and Canada in similar geological settings provides a basis for management to believe that it will be able to interest joint venturers in its proposed mining ventures. However, in the event the Company is unable to either solicit joint venture partners or otherwise obtain the capital deemed necessary in order to commence mining

operations, it is possible that management will reconsider the Company's business plan and begin to seek out other viable business opportunities in order to provide the Company's shareholders with liquidity.

The Company currently has no employees and relies upon the unpaid services of its officers for the operation of the Company. The contracted services of individuals will continue until it is justifiable to employ a full time employee.
