## **LIFELINE THERAPEUTICS, INC. ENGAGES TAGLICH BROTHERS, INC.**

DENVER, Colorado -- Lifeline Therapeutics, Inc. ("Lifeline" or the "Company") (OTCBB: LFLT), maker of Protandim®, today announced that it has engaged Taglich Brothers, Inc. to create and disseminate comprehensive quarterly research reports.

Taglich Brothers, Inc. is a full-service broker dealer focused exclusively on microcap companies. Taglich Brothers defines the microcap segment of the equity market as companies with less than \$250 million in market capitalization. Taglich Brothers currently offers institutional and retail brokerage services, investment banking and comprehensive research coverage to the investment community.

All research issued by Taglich Brothers is based on public information. Taglich Brothers does not currently have an investment banking relationship with the Company and has not been a manager or co-manager of any offering for the Company within the last three years. The Company paid an annual engagement fee of \$21,000 on January 31, 2006 to Taglich Brothers, Inc. for the creation and dissemination of research reports. For further information, please see the Taglich website at <http://www.taglichbrothers.com>.

### **About Lifeline Therapeutics**

Lifeline Therapeutics, Inc. markets Protandim®, a patent-pending dietary supplement that increases the body's natural antioxidant protection. Lifeline Therapeutics is committed to helping people achieve health and wellness for life. For more information, please visit the Protandim® product website at <http://www.protandim.com>.

Oxidative stress (cell damage caused by free radicals) occurs as a person ages or is subjected to stresses such as certain illnesses. TBARS are harmful, reactive substances that indicate the level of oxidative stress in the body. New data from a scientific study in men and women show that after 30 days of taking Protandim®, the level of circulating TBARS decreased an average of 40 percent, and the age-related increase in TBARS was eliminated. Protandim® strengthens a person's defenses against oxidative stress by increasing the body's natural activity of antioxidant enzymes.

Except for historical information contained herein, this document contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 and applicable common law. These statements involve known and unknown risks and uncertainties that may cause the Company's actual results or outcomes to be materially different from those anticipated and discussed herein. Further, the Company operates in industries where securities values may be volatile and may be influenced by regulatory and other factors beyond the Company's control. Other important factors that the Company believes might cause such differences include the Company's limited cash flow and the rapid development of technology, lack of liquidity for the Company's common stock, working capital shortages, the length of time for scientific advances to reach the market (if they ever reach the market), among other risks. In assessing forward-looking statements contained herein, readers are urged to carefully read all cautionary statements contained in the Company's filings with the Securities and Exchange Commission.
