About Protandim®

Protandim® is a patent-pending dietary supplement that increases the body's natural antioxidant protection by inducing two protective enzymes, superoxide dismutase (SOD) and catalase (CAT). These naturally occurring enzymes become overwhelmed by free radicals as we get older. Oxidative stress (cell damage caused by free radicals) occurs as a person ages, when subjected to environmental stresses or as an associated factor in certain illnesses. TBARS are laboratory markers for oxidative stress in the body. Data from a peer-reviewed, published scientific study in men and women, sponsored by LifeVantage, show that after 30 days of taking Protandim®, the level of circulating TBARS decreased an average of 40 percent, with this decrease shown to be maintained at 120 days. Protandim® strengthens a person's defenses against oxidative stress by increasing the body's natural antioxidant enzymes.
